ARB Auto Payment Reminder

Dashboard KPIs & Reminder Logs — Reference Guide

Version 1.0
October 2026
ARB Internal Use

SECTION 1 Dashboard KPI Cards — What every number means

	What it shows	How it's calculated
Master Contacts Admin only	Total number of dealer/customer companies saved in your Master Contact database (your contact book).	Count of all rows in the Master Contacts database for your workspace.
Due Records	Total number of individual invoices currently uploaded in your Due Sheet. One row = one invoice.	Count of all invoice rows in the currently loaded Due Sheet.
Pending Reminders	Reminders that have been *generated* but not yet *sent* — sitting in the queue, waiting for dispatch.	`Count WHERE status = "pending"`
Sent Messages	Total reminders successfully delivered to date, with a sub-breakdown by channel: Email / WhatsApp / SMS.	`Count WHERE status = "sent"` Split by: `channel = "email" | "whatsapp" | "sms"`
Total Outstanding	The total ₹ amount your customers currently owe — sum of all invoice amounts in the loaded Due Sheet.	`SUM of all "amount" values in Due Sheet`
Today's Reminders	Reminders that were successfully sent on *today's date only* — confirms the batch you dispatched went through.	`Count WHERE status = "sent" AND date = TODAY`
Success Rate	Percentage of reminders that were successfully delivered out of all that were attempted (sent + failed). Pending are excluded.	`ROUND( Sent ÷ (Sent + Failed) × 100 )%` Returns 0% if nothing has been processed yet.
Failed Deliveries	Reminders that could not be delivered (usually missing email/phone in Master Contacts) + the failure rate %.	`Count WHERE status = "failed"` Failure Rate: `ROUND( Failed ÷ (Sent + Failed) × 100 )%`

💡 **Tip —** If **Success Rate** is low or **Failed Deliveries** is high, go to *Master Contacts* and add missing email addresses or phone numbers for the affected dealers.

SECTION 2 Reminder Logs Page — Stats Bar

	What it shows	How it's calculated
Dealers in History	Unique dealers who have ever received at least one reminder — persists even after their invoices are removed from the Due Sheet.	Count of distinct dealer groups from all sent reminder logs.
Total Sent Reminders	Grand total of all individual reminder messages sent across all time and all dealers.	`Count of all logs WHERE status = "sent"`
Avg Elapsed Days	On average, how many days ago was the last reminder sent to each dealer. A high number means some dealers haven't been followed up recently.	`AVG( today - last sent date ) for every dealer` — shown as "X.X d"
In Cooldown < 5 Days 🔴	Dealers reminded **within the last 5 days** — in cooldown, do NOT send another reminder yet.	`Count of dealers WHERE elapsed days < 5`
Cooldown Over ≥ 5 Days 🟢	Dealers whose last reminder was **5 or more days ago** — ready for the next follow-up.	`Count of dealers WHERE elapsed days ≥ 5`

ℹ️ **5-Day Cooldown Rule —** The system enforces a minimum 5-day gap between reminders to the same dealer. This prevents accidentally spamming the same customer multiple times and keeps communication professional.

SECTION 3 Understanding "No Active Due Sheet" & "(Archived)"

Where you see it: In Reminder Logs, under a dealer's amount card — e.g.
₹92,932.91 (Archived)
No Active Due Sheet

📋 What "No Active Due Sheet" means

The system has reminder history for this dealer, but when it looks at your **currently uploaded Due Sheet**, it cannot find their

💰 What "(Archived)" on the amount means

The ₹ figure shown is the **last outstanding balance recorded** in any past reminder log for that dealer — not necessarily what they owe today. It is historical reference only.

`MAX(totalOutstanding) from all past sent logs for this dealer`

invoices anymore.

In simple words: *"We sent them reminders before, but right now their invoice isn't in your dues file."*

Why does this happen?

- ✅ **Dealer paid their bill** — you updated the Due Sheet and removed their invoice. Most common reason. The history remains for audit. This is normal and expected.
- ⚠️ **New Due Sheet uploaded without this dealer** — they weren't due this cycle or their balance was settled in your ERP before re-upload.
- ⚠️ **Dealer name/code mismatch** — the code or name in the new Due Sheet is slightly different (e.g., extra space, different dash). The system can't match them even if they still owe money.

Your situation	What to do
✅ Normal Dealer paid — invoice removed from Due Sheet	Nothing needed. This is expected behaviour. Reminder history is kept for audit purposes.
⚠️ Check Dealer still owes but not in Due Sheet	Re-upload a fresh Due Sheet that includes their outstanding invoices.
🔴 Fix Dealer is in Due Sheet but label still shows	Check for a name or code mismatch. The dealer code in the new Due Sheet must exactly match the one stored in the old reminder log.

GLOSSARY Key Terms — Quick Reference

Term	Plain English Definition
Due Sheet	The Excel file you upload with all outstanding invoices. Each row = one invoice/bill.
Master Contacts	Your dealer contact book — stores emails, WhatsApp numbers, phone numbers used to send reminders.
Pending	Reminder was generated and is in the queue — not sent yet.
Sent	Reminder was successfully delivered to the dealer.
Failed	Delivery failed — usually because Master Contacts is missing the email or phone number.
Bill Age	Days from when the invoice was raised to today.
Overdue	Days past the payment due date. "Current" means not yet overdue.
Cooldown (5d)	Minimum 5-day wait enforced between reminders to the same dealer — prevents spam.
Elapsed Days	How many days have passed since the last reminder was sent to a dealer.

Term	Plain English Definition
Archived	Historical amount — the last balance recorded in reminder logs; no longer in the active Due Sheet.
Ageing Stage	The "bucket" an invoice falls into by age (e.g., 30–45 days, 60+ days) — determines which reminder template is used.
